

ABOUT THE PCR N

Our vision is to foster a productive, collaborative and sustainable program of research aimed at enhancing the quality of palliative care.

STRATEGIC OBJECTIVES

1. To foster capacity building through mentorship of researchers and the provision of networking and collaborative initiatives.
2. To provide development opportunities to researchers establishing a career via the identification and provision of research funding and training opportunities.
3. To create linkages to the local, national and international context through research partnerships and effective communications and marketing.

The PCR N is funded by the Victorian Cancer Agency and the Victorian Department of Health. The Centre for Palliative Care is the administering organisation.

MEMBERSHIP

Membership to the PCR N is free of charge and open to all professionals with an interest in palliative care research.

Key benefits of membership include:

- ⌘ An opportunity to network and collaborate with other palliative care researchers through PCR N forums and workshops.
- ⌘ Opportunities for senior researchers to mentor early career researchers.
- ⌘ Access to a variety PCR N funding schemes including; PhD scholarship, small project and travel grants.
- ⌘ Support with developing your research idea into a potential project and grant proposals via the PCR N Concept Development Workshops.
- ⌘ Early career researcher opportunities for mentorship, networking and collaboration.
